Hegrecat ® BA104

General Description
Hegrecat BA104 catalyst is an acid blocked catalyst with blowing catalytic property, it delivers delayed-action enhancement. BA104, therefore, allows customer to work with a more complicated designed molded system and increasing open cell.

Product Property
- Delayed blow reaction for extended pour times needed to produce complex parts
- Open cell due to blowing catalytic property with reduction in force-to-crush

Applications
Hegrecat BA104 is recommended for molded foam which needs good flow for complicated design and also good cell open foam

Typical Physical Property

Storage and package Information
HeJia Chemical recommends that our catalysts be stored in a dry and cool area under appropriate ventilation conditions. Each container should be closed tightly to avoid contamination with moisture or other negative influences, which could change the products’ performance in the end use. Lower and higher storage temperatures are not preferable and should be avoided. 180kgs per steel drum.

Shelf Life
36 months from the date of production
