General Description

Hegrecat TA114 catalyst a formulated tertiary amine catalyst. It is designed as sole catalyst to provide improved processing latitude with extra benefit of increased hardness due to change of foam morphology.

Product Property

- Wide processing latitude
- Balanced reaction for wide range of foam density
- Extra benefit of increased hardness

Applications

Hegrecat TA114 catalyst is recommended for low to high density of slab foam, particularly when increased hardness is desired.

Typical Physical Property

Storage and package Information

HeJia Chemical recommends that our catalysts be stored in a dry and cool area under appropriate ventilation conditions. Each container should be closed tightly to avoid contamination with moisture or other negative influences, which could change the products’ performance in the end use. Lower and higher storage temperatures are not preferable and should be avoided. 200kgs per steel drum.

Shelf Life

36 months from the date of production
