General Description

HegreZeo SSZ 13 is the classic chabazite structure with eight – rings as the largest apertures produced only C5 and smaller, and highly olefinic products.

Product Property

Application

It is widely used for vehicle exhaust purification catalyst carrier, MTO reaction, etc.

Typical Physical Property

Appearance: White Powder
Specific Surface sqm/g: $\geq 600$
Crystallinity: $\geq 95$
SIO/Al2O3: $30 \pm 2$
NA2O m% $\leq 0.07$

Shelf Life

24 months from the date of production
